

Lean Construction Certification Program (LCCP)

Module 5 – Jobsite Organization: 5S & Standard Work

Learning Objectives

- Implement a 5S program
- Understand Standard Work
- Separate internal from external time
- Create Standard Work construction processes
- Create optimal Job Site Organization

Course Description

This participative workshop has delegates learning 5S and job site organization principles and applying the lessons of the workshop in the workplace.

Course Contents

Five S

- Understanding 5S
- Implementing 5S pilot program

Introduction to Standard Work

- How to reduce construction stoppage time
- How to optimally organize a job site or office environment

Create a standard work sheet

- Understand the process
- Separate internal from external
- Streamline the process

Jobsite Organization

- Apply 5S and standard work to the organization of the job site or office environment

Final exam prep with study guide

All the modules are highly interactive, workshop-based learning experiences. They are designed to maximize the transfer of knowledge by carrying out hands-on exercises under the guidance and coaching of the course tutor. Although they are all based on a half-day timescale, the modules are sufficiently flexible to be easily extended to whole days by increasing the time spent on practicing the tools and techniques involved.
